WL59 K-only boundary readout | seed5901 | field62 | bottom | face-readout F/S L1 4.13e-08
Incident blue irradiance
0 to 0 flux / area (own scale)
Current physical oracle
1.00% RGB components clipped
Full rebuilt learned state F
0.00% RGB components clipped
Selective resident state S
0.00% RGB components clipped
Stale physical K, current readout
1.08% RGB components clipped
Oracle geometry delta — blue
F geometry delta — blue
S geometry delta — blue
Material x (mm)
Material y (mm)
Signed blue outgoing-bin radiance change
Stored first-exit flux / (current cell area x projected-bin angle). Not Cycles or coupled GI.
All RGB panels share log display and reference p99 exposure; delta panels share a symmetric scale. Post hoc views.
